(Vitamin A, Vitamin D3, Vitamin E, Zinc oxide)

**Read all of this leaflet carefully before you start using this medicine because it contains important information for you.**

- Keep this leaflet. You may need to read it again.
- If you have any further questions, ask your doctor or pharmacist.
- This medicine has been prescribed for you only. Do not pass it on to others. It may harm them, even if their signs of illness are the same as yours.
- If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet. See section 4.

#### **What is in this leaflet:**

1. What Baby Cream is and what it is used for
2. What you need to know before you use Baby Cream
3. How to use Baby Cream
4. Possible side effects
5. How to store Baby Cream
6. Further information

#### **1. WHAT BABY CREAM IS AND WHAT IT IS USED FOR**

Baby Cream contains vitamins A, D3 and E, and zinc oxide. It is used in cases of dehydration of the outermost layer of skin (the epidermis), especially in neonates and premature children, in skin redness and irritation (i.e. from diapers), and to protect and keep sensitive and delicate skin safe in this age group.

## **2. WHAT YOU NEED TO KNOW BEFORE YOU USE BABY CREAM**

Do not use Baby Cream on your baby if they are hypersensitive to any of the ingredients of this cream.

### **Warnings and precautions**

Talk to your doctor or pharmacist before using Baby Cream. This product is for external use only. This cream should not be allowed to come into contact with the eyes or other mucous areas of your baby, because it may cause burns and irritation. Therefore, application of the cream around these areas should be done with caution.

### **Other medicines and Baby Cream**

There are no known interactions with any other products.

### **Using Baby Cream concomitantly with food and drinks**

Use of Baby Cream is not affected by food or drinks.

### **Pregnancy and breastfeeding**

Baby Cream is safe to use during pregnancy and breastfeeding.

### **Driving and using machines**

Use of Baby Cream does not affect driving or using machines.

### **Important information about some of the ingredients of Baby Cream**

Baby Cream contains:

- methyl hydroxybenzoate and propyl hydroxybenzoate, which may cause allergic reactions (possibly delayed);
- hydrogenated wool fat, which may cause local skin reactions (e.g. contact dermatitis).

### **3. HOW TO USE BABY CREAM**

Apply an amount of Baby Cream several times a day to your baby's body areas that you want to protect.

### **4. POSSIBLE SIDE EFFECTS**

Like all medicines, Baby Cream can cause side effects, although not everybody gets them.

The side effects that this product may cause are very rare. Skin allergic reactions, hypersensitivity reactions or irritation may occur.

Inform your doctor or pharmacist if these side effects or any other side effects not mentioned in this package leaflet occurs to your baby.

### **5. HOW TO STORE BABY CREAM**

Keep out from the sight and reach of children.

Do not store above 25°C.

Store in the original packaging.
